

High-performance cloths.
Essential for immaculate surfaces.

Spies Hecker – simply closer.

Spies Hecker. High-performance cloths.

In addition to its paint range, Spies Hecker now offers specialist products for cleaning and degreasing of substrates and for high-quality polishing jobs.

Used in combination with Spies Hecker cleaners and silicone removers, these high-grade bodyshop cloths create a dust and grease-free surface and smooth the way to a flawless paint finish.

Quality knows no compromises.

Essential for immaculate surfaces.

Spies Hecker Cleaning Cloth.

An extremely hard-wearing and versatile cleaning cloth.

Highly absorbent, it is ideal for general use in the bodyshop.

The Spies Hecker Cleaning Cloth is made of special, lint-free fabric and has no adhesives or binders.

Fields of application:

- General cleaning jobs in the bodyshop
- Cleaning of painting accessories
- Rough cleaning during surfacer and putty application

Available in units of:

400 cloths / roll

Article No. D13318404

Cloth size: 300 x 380 mm

Spies Hecker Degreasing Cloth.

An extra heavy-duty cloth for all cleaning tasks in the bodyshop.

This cloth can be used with solvent and waterborne cleaners as well as silicone removers.

Manufactured by a special process, it is completely free of chemicals. Even when wet, it is exceptionally tear-resistant, highly absorbent and lint-free.

This cloth can help reduce paint defects.

Fields of application:

- General surface preparation with solvent-based or waterborne cleaners or solvent containing silicone removers
- All types of surface cleaning before the application of primers and top coats
- Cleaning of painting accessories

Available in units of:

200 cloths / carton

Article No. D13318393

Cloth size: 325 x 420 mm

500 cloths / roll

Article No. D13318384

Cloth size: 325 x 390 mm

Spies Hecker Tack Cloth.

A new generation of final tack cloth with static properties for final cleaning before top coat application.

Unlike conventional tack cloths, it leaves no chemical or adhesive residue on the surface or user's hands. This ensures the surface being treated remains free of sticky marks and fingerprints.

The risk of smears or streaks is significantly reduced.

Made of modern spun bonded fabric, this cloth is extremely absorbent and doesn't fray.

Fields of application:

- Removes the finest particles before the application of top coat systems
- Perfect for the repair of plastics

Available in units of:

6 cloths folded in a sealed bag with a zip-type closure

Article No. D13295540

Cloth size: 381 x 432 mm

Spies Hecker Polishing Cloth.

An extremely soft cloth for delicate and difficult polishing tasks. A combination of viscose and polyester fabrics makes it extra fleecy. Its special spun bonded structure prevents any pulling of threads, fraying and fluffing.

Because it is completely free of additives that could leave streaks, the Spies Hecker Polishing Cloth is also ideal for the treatment of chrome, glass and parts of the interior.

Fields of application:

- Manual polishing
- Final treatment of external surfaces
- Interior cleaning

Available in units of:

275 non-woven cloths on a roll in a box dispenser

Article No. D13318369

Cloth size: 365 x 400 mm

30 non-woven cloths folded in a sealed bag

Article No. D13318374

Cloth size: 360 x 380 mm
