

OEM Approvals.

Compelling arguments for a good partnership.

Approvals.

Our claim to be a partner to the automobile industry is not just empty words. We are proud that Spies Hecker has the most approvals of any paint producer. Specifically, we supply paint systems precisely geared to the high quality demands of the various car manufacturers. Spies Hecker offers specific national packages for the car and commercial vehicle sectors that meet the high standards of the automobile industry and required legalisation to increase the profits of bodyshops.

Service according to a system.

The approvals we receive are always linked to extensive services we offer. We provide on-the-spot support for practical refinishing, run technical training courses and management seminars, help with business analyses and efficient business planning - all this to ensure the quality and profitability of bodyshops. It's good to know that everything is running smoothly, because that enables the manufacturer's organisation to focus on its core business.
