National Training Courses

Spies Hecker offers an extensive range of quality training seminars. These workshops are prepared and coordinated by Spies Hecker personnel who are nationally accredited workplace Assessors and Trainers, and have vast experience with Spies Hecker products and procedures.

Refinish paint technology now and in the future will require the use of high performance products including the latest water-based and High-Solids systems.

The need for training in the use of Spies Hecker high performance products and warranty repair processes is essential for the success of any bodyshop.

Seminars are held at our purpose built Regional Training Centre at Marsden Park, Sydney, or at other approved centres around Australia and New Zealand.

In a modern comfortable and well equipped environment, students have access to the latest products which include Waterborne, infra-red technology, and the latest in Spies Hecker High Performance VR paint products.

Both theoretical seminars and practical workshops are catered for in the Regional Training Centre, which is equipped with a theory room and state-of-the-art spray booths and colour mixing rooms.

The Centre is a visible example of the company's commitment to the refinish industry and to the provision of first class training programs for both bodyshop staff and management.
