

Speed Repair Systems - Spies Hecker UV Primer & Fast Clears

Description

Gain knowledge in working with rapid repair processes. This course will provide participants with specialist information on the repair procedures and products required to successfully repair vehicles with UV primers and fast processes. Participants will experience hands-on surface preparation and application guidance along with demonstrations and theoretical know-how and training directly relating to smaller repairs.

Method

This course is a balance of theory and practical exercises and is aimed to give an advanced insight and coaching for existing experienced bodyshop operatives.

Target Group

Learn about the best selection of products to maximise productivity and speed up the repair process for experienced bodyshop technicians

Aim of the Course

The course is aimed at refinishers who want to use Fast Repair techniques for faster throughput of small repairs

Course Duration

1 day

Attendees should bring safety boots and work clothes. Spies Hecker will supply Spray overalls and PPE.
