

# Painting in a **New Environment.**

Spies Hecker – simply closer.

# Your future starts now!

## HI-TEC – the new Spies Hecker waterborne Base Coat 480.

Your work revolves around the base coat system. It gives optimal support to your work process if it is simple and reliable to apply. In this connection, Permahyd® Hi-TEC 480 from Spies Hecker marks a breakthrough in the refinishing sector. Permahyd® Hi-TEC Series 480 sets new standards of ease of processing, high process security and more flexible application. Benefits that will impress all refinishers using it for the first time.

## HI-TEC Is progress.

*Permahyd® Hi-TEC combines the knowledge from our research and development departments with the experience of our technicians from over 50 countries. The new Permahyd® Hi-TEC system is based on a totally new, patented hybrid technology. Its pioneering mixing colors create an exceptionally uniform effect. Thanks to their high pigmentation, they achieve extremely high opacity. What's more, Hi-TEC can be mixed with Permahyd® Hardener 3080, which proves highly beneficial for interior and multi-stage paintwork. The base coat system is distinguished by its very simple processing. When adjusting the material's viscosity, a specially developed additive helps to optimize spraying characteristics.*

## HI-TEC - the HI-BRID System

*Permahyd Hi-TEC's unique hybrid system caters for the advanced user whose bodyshop is driven by technology and naturally requires outstanding results in all conditions.*

## Four Dimensions of Hi-TEC

### Advantages that really impact

#### 1. HI-TEC:

Outstanding Results in All Conditions  
- All Round System

- Suitable across all conditions and applications
- Greater flexibility for interior, multi-stage and multi-colour finishes.
- Unparalleled capability across all types of repairs and finishes.
- No job too hard
- Highly reliable results thanks to its uniform effect

#### 2. HI-TEC:

Driven by Technology

- Connected to all technology
- The most advanced E- connectivity
- Latest evolution of colour technology
- Leading digital age training and advice

#### 3. HI-TEC:

Safer and Cleaner

- Get the environmental edge
- Water based system
- Safe solution - limit solvent use
- Low impact, Hybrid technology
- Easy clean

#### 4. HI-TEC:

Quick and Easy Processing

- Simple and reliable blending in
- Short process time
- Outstanding flow

*Permahyd Hi-TEC's unique hybrid system caters for the advanced user whose bodyshop is driven by technology and naturally requires outstanding results in all conditions.*

**Permahyd®**  
**Hi-TEC**

“Incredible how easy Permahyd® Hi-TEC is to apply.”

## Hi-TEC. Digital color management.

Measure the color, search for the formula and mix the color – Spies Hecker has the right tool for each work step. Everything is geared perfectly to Permahyd® Hi-TEC 480.

### • ColorDialog spectro.

The color is analysed at the vehicle in a matter of seconds. Via 3 angles, the ColorDialog searches for the color that matches best.

### • CRplus.

The CRplus color search program evaluates the electronically imported data and displays a color formula in a matter of seconds. In addition, the new program modules present a clear overview of quantities used, current stocks and orders. Processes in the mixing room can thus be controlled even better.

“Having introduced Hi-TEC, I now rely entirely on digital support when searching for colors – I don't want to leave anything to chance.”

## Hi-TEC. Adapted accessories.

• **ColorTint PC system.**  
Forward-looking technology for accurate color mixing.

• **Bar code Reader.**  
The color codes can be read-in quickly and conveniently from the back of the Hi-TEC Variant Index.

## Hi-TEC. Advanced training

- Connected to all technology
- The most advanced E- connectivity
- Latest evolution of colour technology
- Leading digital age training and advice

**Permahyd®**  
**Hi-TEC**

● **Mixing stick.**

For standard mixes, Speed Repair and multi-stage finishes, there's a matching mixing stick.

● **High-performance cloths.**

The right materials for cleaning and degreasing substrates and for high-quality polishing work.

● **Workshop poster.**

For rapid familiarization with Permahyd® Hi-TEC there are various practical posters that neatly present each work step.

**Hi-TEC. Coming to your bodyshop soon.**
