

Perfectly clear.

The Permasolid® HS Clear Coat range.

Spies Hecker – simply closer.

HS clear coats for any conditions.

A clear coat has to be seen to be perfect. And a modern clear coat has to combine ease of application with gloss and flow. However, since the conditions in each repairshop differ, it is essential that the clear coat is capable of adapting.

Spies Hecker's Permasolid® HS Clear Coat range contains five products with different profiles that enable them to adapt precisely to all bodyshop conditions. All the clear coats are distinguished by their brilliant finish and easy application.

Find the clear coat that suits you!

Permasolid® HS Clear Coat 8030.

Unbeatable gloss.

- Easy application: one spray pass without intermediate flash-off
- Good flow
- Economical thanks to its high solids content
- Brilliant surface finish

Permasolid® HS Clear Coat 8035.

The all-rounder.

- Universally applicable for all types of repair, e.g. spot repairs and part and total resprays
- Application in a single pass
- Good flow
- Rapid drying
- Good polishing

NEW

Permasolid® HS Clear Coat 8033.

User-friendly.

- For easy changeover to VOC-compliant clear coats
- Application in two coats – comparable to MS clear coats
- Adjust by adding reducers
- Very good flow
- Very good vertical stability

Permasolid® HS Optimum Clear Coat 8600.

High productivity.

- Simple and economical application
- Application in just a single spray pass
- Fast drying
- Very good IR drying
- Rapid and easy polishing
- High-gloss clear coat finish

All the products presented in this folder comply with the strict VOC guidelines.

A system for the future.

	High Solids hardener	Very High Solids hardener	Reducer

Permasolid® HS Clear Coat 8035	✓		
Permasolid® HS Clear Coat 8033		✓	✓
Permasolid® HS Optimum Clear Coat 8600		✓	
Permasolid® HS Diamond Clear Coat 8450		✓	

The new-generation hardeners.

All Permasolid® Clear Coats are mixed with high-solids hardeners. The higher solids content of these hardeners improves coverage, reduces the quantities of materials required and at the same time permits perfect adaptation to a wide range of application conditions.

Spies Hecker Mixing Cup.

This way mixing becomes simple – all the mixing ratios for Spies Hecker products on a one-way mixing cup. Easy-to-read graduations with coloured marks make the painting process easier.

Permasolid® HS Diamond Clear Coat 8450.

Higher scratch resistancy.

- The specialist product for the repair of scratch resistant automotive finishes
- Flexible “reflow” effect
- Simple application in just one spray pass
- Excellent gloss and an immaculate finish
- Good polishing

“The easy, straightforward application and rapid drying of Permasolid® HS Optimum Clear Coat 8600 make this product my personal favourite. It made changing over to high solids products much easier than I expected.”
