Spies Hecker – simply closer.

An Axalta Coating Systems Brand

One for everything.

New Permasolid® HS Vario Primer Surfacers 5340 is a multifunctional high-solids surfacer for low-cost car refinishing that can also be used efficiently on plastics parts.

Varied range of applications:

- **Varied use:** Suitable as a wet-on-wet or sanding Primer Surfacers.
- **Varied substrates:** Can be applied straight onto bare metal like steel, zinc, aluminium or on all plastics commonly used for passenger cars in combination with Permasolid® Plastic Additive 9060.
- **Varied repairs:** Anything from Speed Repairs to full resprays.

Product characteristics.

- Good overspray absorption during wet-on-wet application.
- Smooth flow.
- Excellent adhesion.
- Good corrosion protection.
- Rapidly ready for recoating with all Spies Hecker top coats – wet-on-wet. Good gloss and flow are achieved.

Available in two colors.

- Light grey and black.
- For perfect adaptation to the base coat color.
- Improves the opacity of critical colors.

Plastic Additive 9060.

- Achieves outstanding adhesion on all plastics commonly used for passenger car.
- Has elasticising properties.
- Plastic Additive added instead of Reducer.
