

Achieve the desired appearance in no time!

– with Permacron® Rapidflex Clear Coat 8065.

Spies Hecker – simply closer.

Take a closer look at high speed refinishing.

Give your customers what they want – a top quality finish in double quick time. With easy to use and highly flexible Permacron® Rapidflex Clear Coat 8065.

Faster turnaround for customers

Thanks to Axalta's advanced technology, this new clear coat dries in as little as 15 minutes at 60°C. Alternatively, you can dry in 30 minutes at 40°C or air dry in 2-3 hours to save energy. Use it for all types of paint jobs – from spot repairs and panel repairs to full car sprays.

The finish your customers demand

Rest assured that whatever drying option you use – whether baking or air drying – you can count on a great finish every time – even under conditions of high temperature and humidity.

So flexible, so easy to use

The new clear coat is very flexible and can be used over both solvent-borne and waterborne basecoats. To help you to the max, it can also be used with your current reducers and hardeners.

A GREAT FINISH WHETHER YOU BAKE OR AIR DRY!

- 15' @60°C bake
- 30' @40°C bake
- 2-3 hour air drying time

All with no compromise on appearance

Not a moment to lose...
