

Take energy savings to the next level.

With the next generation of Speed-TEC System.

Spies Hecker – simply closer.

The turbo system with reduced energy consumption.

The Speed-TEC System from Spies Hecker is designed for body shops where performance matters. Known for its fast process times and low-energy curing, it now goes even further with a next generation, OEM-approved clearcoat and one surfacer that works for both sanding and wet-on-wet version repairs. Whether your focus is on speed, efficiency, or finish quality, the latest generation of Speed-TEC helps you deliver more jobs per day while consuming less energy.

The Speed-TEC family of products.
Priomat® Reactive Pretreatment Wipes 4000
Permasolid® HS Speed-TEC Speed Surfacers 5560
Permahyd® Hi-TEC Base Coat 480
Permasolid® HS Speed-TEC Speed Clear Coat 8820

Fast, reliable processing.

Thanks to short flash-off times and low-temperature curing, the Speed-TEC System helps reduce total cycle time to as little as 40 minutes at 40°C (application, flash off, spaybooth ramp up time and drying times included).

Low energy consumption.

Speed-TEC technology enables full drying at just 20°C – supporting energy savings of up to 49%, without compromising performance.

Glossy, OEM-approved finish.

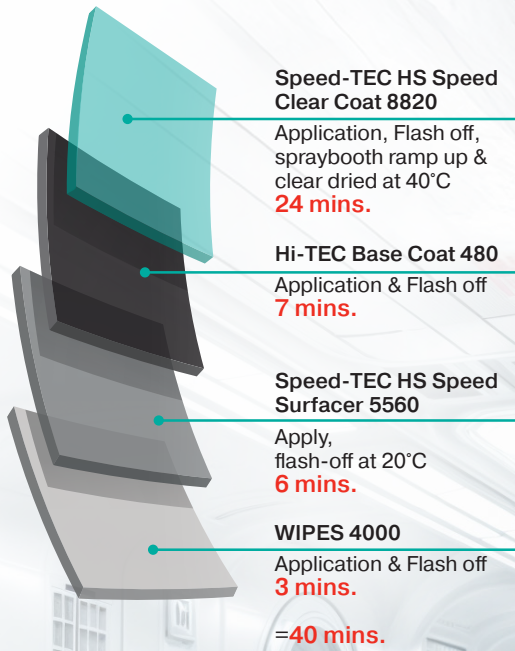

The new Speed-TEC clearcoat delivers a durable, scratch-resistant finish that meets OEM specs - ideal for high-quality, warranty-grade repairs.

Simplified workflow.

One surfacer for sanding and wet-on-wet. One hardener across the system. Less product complexity. More flexibility for your team.

The fastest application with brilliant character.

A smarter way to work - and grow

The latest generation of Speed-TEC products is designed to help body shops work faster, reduce costs, and offer customers even more flexibility - all while maintaining a premium finish.

Boost booth throughput.

Faster drying products mean less time in the spray booth, freeing up capacity and increasing the number of jobs you can complete each day.

Avoid costly upgrades.

Not every spray booth can reach 60°C - and with Speed-TEC, it doesn't have to. The system performs at 20°C or 40°C, helping you save energy and potentially avoid major equipment investments.

Make quick repairs more profitable.

The efficient workflow and reduced process time make smaller repairs more cost-effective - opening up new business opportunities.

Offer same-day or fast-turnaround services.

With the new all-in-one surfacer and fast-curing clearcoat, you can offer customers premium same-day repairs or even "while-you-wait" refinishing on select jobs.

Spies Hecker, a global refinish coating brands from Axalta Coating Systems, develops optimum and practical paint system solutions that can make bodyshop work easier and more efficient. With more than 140 years of success behind it, Spies Hecker's high-quality product systems, customised service and targeted training demonstrate its partnership with the refinish industry. Based in Cologne, Germany, it is one of the world's leading vehicle refinish brands, and is available in over 76 countries worldwide.
