Spies Hecker – simply closer.

Faster turnaround means happier customers.

Give your customers new levels of service for spot repairs in terms of speed, quality of finish and environmental responsibility.

Faster service

Thanks to a curing time of just one minute, you cut waiting times –for you and your customers. Look forward to faster throughput and a new profit center in cosmetic repairs.

So easy

You don't need any activator or thinner so you can get started right away. 1K technology means there's minimal cleaning and you won't need to worry about pot life. For more convenience, it is available as 1L can and 0,4L aerosol.

Quality finish

Superb adhesion properties ensure that paint is easy to apply, lasts longer and offers excellent corrosion protection.

More sustainable solution

By cutting CMR-chemicals, this state of the art UV primer surfacer has less environmental impact. It also generates minimal waste and saves energy because it requires no baking.
