

Reducers

Permacron® Reducer 3364

Permacron® Reducer 3364.

Permacron® Reducer for Passenger Car Refinishing. Universal reducer for all 2K acrylic products. Adjusts the viscosity of priming materials and top coats at low and medium temperatures.

Permacron® Reducer 3365 slow.

Permacron® Reducer for Passenger Car Refinishing. Reducer for all 2K acrylic products. Improves levelling and absorption of overspray at spray booth temperatures of above +25°C and for large objects.

Permacron® Reducer 3366 extra slow.

Permacron® Reducer for Passenger Car Refinishing. Reducer for all 2K acrylic products. Improves levelling and absorption of overspray at spray booth temperatures of above +35°C and for large objects.

Permacron® Reducer 3380

Permacron® Reducer 3380.

Permacron® Reducer for Passenger Car Refinishing. This specially developed reducer is particularly suited to reduce the viscosity of Permasolid® HS Automotive Top Coat Series 275, Permasolid® 2K acrylic surfacers and Permasolid® HS clear coats mixed 3:1 with Permasolid VHS hardener plus reducer. Adjusts the viscosity of priming materials and top coats at low and medium temperatures.

Permacron® Reducer 3385 slow.

Permacron® Reducer for Passenger Car Refinishing. This specially developed reducer is particularly suited to reduce the viscosity of Permasolid® HS Automotive Top Coat Series 275 and Permasolid® 2K acrylic surfacers.

It may also have a positive effect on the VOC content of several products. Improves levelling and absorption of overspray at spray booth temperatures of above +25°C and for large objects.

Permacron® MS Dura Plus 8580

Permacron® Reducer for Passenger Car Refinishing.
Reducer with drying accelerator for all 2K acrylic products.

Adjusts the viscosity of priming materials and top coats at low and medium temperatures.
