

Hi-TEC System.

For higher throughput in the bodyshop.

Innovative paint products contribute to efficient work processes. The products of the Hi-TEC System are perfectly adapted to each other and are easy to apply. Vehicle processing is accelerated by short application times, rapid drying and simple sanding of the materials.

Hi-TEC system

Perfect colour every time – generation after generation.

Permahyd® Hi-TEC Base Coat 480

Permahyd® Hi-TEC Base Coat 480 is an easy-to-use innovative waterborne basecoat system that gives you the highest colour accuracy and optimal paint results, even for special colours and paint effects.

It's the basecoat for the most challenging car refinishing jobs. All solid and effect colours for high quality passenger car refinishing can be mixed from this system.

Perfectly adapted to modern drying methods

Computer-aided infrared dryers are being increasingly used in bodyshops and are employed in those areas where faster and more efficient vehicle throughput is required. The Hi-TEC Performance System is ideally suited to this new technology.

Our painters find the process of blending-in very easy. The high number of available variants is positive and we can match the colour chips in more than 90 % of all cases. The colour panels I paint with HI-TEC now deviate considerably less from the sample panels of our painters.”

Ludwig Bornemann, Head painter, Identica Brillant (Germany)
