

Headlight Repair Kit.

Permahyd Silicon Remover 7080 | Permahyd 1K Headlight Primer 4018 | Permacron 2K Clear Coat 8018

Description

Modern repair system with high-grade paint materials in aerosol cans. Developed to repair small scratches and yellowing of headlight lenses made of polycarbonate.

Features / Benefits

- Dedicated paint systems.
- Repair instead of costly replacement.
- The waterborne Permahyd 1K Headlight Primer 4018 protects polycarbonate and provides adhesion to the substrate and to our Permacron 2K Clear Coat 8018.
- Lasting protection thanks to protective coating.

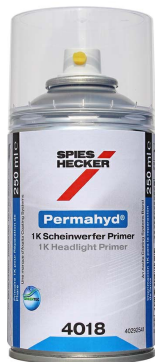

Usage

For repairing superficial weathering defects and scratches or stone impact.

Please note: polycarbonate lenses with deformation, cracks, holes and breaks may not be repaired. The headlight has to be completely replaced.
