

Permafleet CV

Permafleet® - the CV paint system that meets all your requirements.

Whether you paint drivers' cabs, buses or special-purpose vehicles, high quality and efficient application is what always counts. The Permafleet product system provides cost-effective solutions for every requirement, however specific.

Boost the efficiency of your bodyshop.

- Balanced system for commercial vehicle painting – from OEM paintwork to vehicle refinishing.
- Technical solutions for specific requirements.
- Broad product range.
- Practical working aids.
- Extensive range of accessories.
- Individual technical training.

A broad range of colours

Spies Hecker has compiled the product range to suit your needs. Series 600 concentrates are at the heart of the Permafleet commercial vehicle paint range. All the colours are standardized, so high colour accuracy is assured. This mixing system provides you with the whole spectrum of colours.

A balanced system for universal application.

We offer special paint systems that can be adapted precisely to particular applications.

- **Hi-class systems** for exceptionally high-quality 3- or 4-coat paintwork
- **Top systems** for cost-effective 3- or 4-coat commercial vehicle paintwork
- **Economy systems** for cost-effective 2-coat paintwork

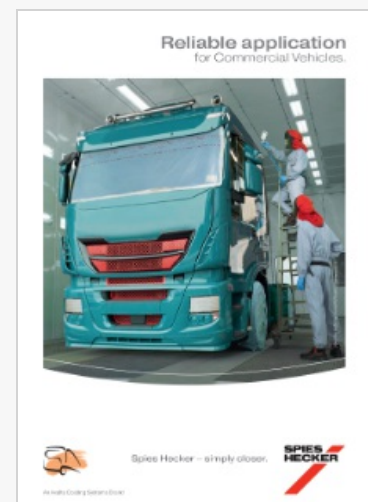

The Permafleet® system is suitable for a wide range of applications including:

- Buses/coaches
- Drivers' cabs
- Vans
- Tank trucks

- Chassis
- Concrete mixers
- Box bodies/trailers
- Tank trucks

Solutions for specific requirements.

Textures and gloss.

Achieve different degrees of gloss by adding a matting agent. Or create textured surfaces, e.g. for non-slip coatings in driver access areas.

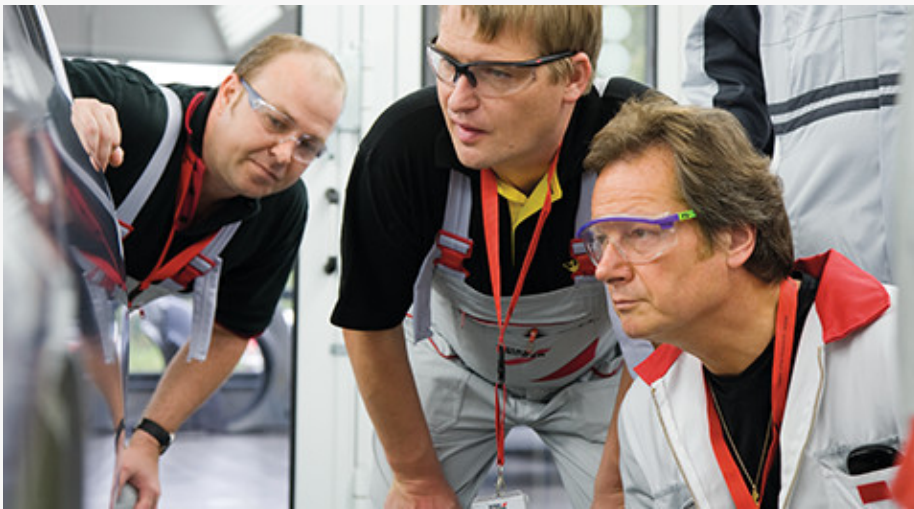

Elastic surfaces.

Create a flexible paint finish on all plastic parts.

Multicolour finishes.

Speed up vehicle throughput and reduce off-road time by using a multicolor additive to accelerate drying.

Training for greater quality and efficiency

The Spies Hecker Training Centre lets you familiarize yourself with new product systems and application methods that make your everyday bodyshop processes easier. All this in a relaxed atmosphere where you can also swap ideas with colleagues from around the world.

Find the right colour every time.

ColorDialog Spectro.

Manufacturers develop new colours more and more frequently. In order to be able to identify them quickly and accurately Spies Hecker has developed the ColorDialog spectrophotometer. Use it to measure the colour at the vehicle in a matter of seconds.

Phoenix.

This web-based software offers access to colour formulas regularly updated via the online Color Cloud database. Bodyshops who use Phoenix can also store and manage the refinish and colour formulas they use in their own internal bodyshop network.
