

Matt and Tinted Clearcoat finishes course.

This two-day course at the Spies Hecker Training Academy in Welwyn Garden City will show the Spies Hecker refinisher how to achieve the highest level of accuracy when matching the new clearcoat trends set by many automotive manufacturers. Participants will gain the necessary theoretical and practical knowledge which is vital in achieving the highest level of accuracy when matching these new colour trends. The course is designed to demonstrate the proven repair methods and show practical tips on how to get the job done quickly and correctly, minimising costly reworks.

Spies Hecker Matt and Tinted Clearcoat finishes training includes the application and blending techniques of a Tinted Clearcoat finish and Matt finish clearcoat. Participants will experience hands-on surface preparation and application guidance with both systems. Our Matt and Tinted clearcoat finishes training course complements the standard courses offered in the Refinish Academy.

At the end of the course, all participants will receive a certificate of completion.

Duration:

Two days.

Suitable for:

Paint technicians with painting experience.

Equipment:

All equipment provided apart from safety footwear.
