World-class: Spies Hecker presents its race spray-gun

For over five years, Spies Hecker has been the paint supplier for five-time FIA Formula 1™ world champion manufacturer Mercedes-AMG Petronas. Now the international paint brand presents a limited special-edition race spray-gun – in Mercedes AMG Petronas Motorsport's distinctive style.

The basis for the design of this spray-gun is the 2018 world championship-winning car and its dynamic lines in Petronas' typical petrol green, which can also be seen on the gun itself. Both sides of this limited-edition race spray-gun also immortalise the starting numbers of Mercedes-AMG Petronas Motorsport's two racing drivers: 44 for five-time FIA Formula 1™ world champion driver Lewis Hamilton and 77 for several-time race winner Valtteri Bottas.

Long-term engagement with the world champions

Technologically speaking, the SATAjet 5000 B RP is also in a league of its own: It's not for nothing that this race gun is used in Mercedes-AMG Petronas Motorsport's headquarters in Brackley, UK, to paint its racing cars. "The unique design of this limited-edition spray-gun represents our long-term partnership with Mercedes-AMG Petronas", explains Joachim Hinz, Spies Hecker Brand Manager. "It also underscores our love of motorsports." The race gun is an officially licensed Mercedes-AMG Petronas Motorsport product, with just 500 pieces to be released worldwide.
